I will try to help a little on document locations.

All of the merge documents are under /k9bytes/Documents/

Directory of C:\data\advanced_Goingeasy\k9bytes\Documents\100-Operational Docs

Borr_Inv_Loan_qry.php

Borr_Summary_qry.php

Ind_Investor_Summary_qry.php

All of the ones that start with AIC.php?CMD=reportproto are in the /k9bytes/Reports/

available_inventory.php

Back_Page.php

closed_business.php

closed_business_annual.php

expired_insurance.php

Expired_Insurance_Qry.php

foreclosure_capital_loss.php

Ind_Borrower_Summary.php

Ind_Investor_Summary.php

jacket_ledger_index_tab.php

ledger_jacket_loan_summary.php

property_tax_worksheet.php

There are a few in the /k9bytes/ directory that I may move into the forms directory.

/k9bytes/AIC.php?CMD=showborrower&id=new when they show new at the end

They are :

borrower.php – Borrower Information Input Form

investor.php – Investor Information Input Form

Standard_Loan.php – Standard Loan I use the Same form or Initial Input and Editing.

There are some things like the windows that pop up from the B I L buttons at the top and county and selection of Investor and Borrower are generated on the fly

so they do not exist as a editable document but a function in the

/k9bytes/AIC.php script.
