[📹] » [WB White Balance] » Desired option* » [✕]

* When you select [🖾 Custom WB], set the custom white balance with the following procedure before touching [✕].

• The icon of the selected white balance setting will appear on the screen.

To set the custom white balance

1 Point the camcorder at a white object, so it fills the screen.

2 Touch [Set WB].

• When the adjustment is completed, 🖾 stops flashing and disappears. The camcorder will retain the custom white balance even if you turn it off.

Options   (♦ Default value)

[AWB Automatic]♦

The camcorder automatically sets the white balance for natural looking colors.

**[☀ Daylight]**

To record outdoors.

[🔆 Tungsten]

To record under tungsten and tungsten-type 3-wavelength fluorescent lighting.

[🖳 Custom WB]

Use the custom white balance setting to make white subjects appear white under colored lighting.

(i)
- When you select the custom white balance:
  - Set 🎥 ❯❯ [Zoom Type] to [32x Optical].
  - Reset the white balance when you change locations or the lighting or other conditions change.
  - Depending on the light source, 🖳 may keep flashing. The result will still be better than with [AWB Automatic].
- Custom white balance may provide better results in the following cases.
  - Changing lighting conditions.
  - Close-ups.
  - Subjects in a single color (sky, sea or forest).
  - Under mercury lamps, certain types of fluorescent lights and LED lights.
